Loss Prevention Solution

Vensafe

ZERO LOSSES, BETTER BUSINESS

Less theft is more profitable

Vensafe is a solution for premium price products that eliminates losses and optimizes inventory operations.

Premium price products are stored in the secure Vensafe solution. This protects profits by preventing all losses due to shoplifting or employee theft.

With Vensafe, retailers don't have to store it or restock in every checkout – only in the Vensafe solution. This improves inventory operations and increases productivity – staff resources can be used for more productive tasks than restocking. The solution also achieves better inventory management and control through a software solution that communicates inventory information.

Customers have the option to purchase premium price products at several points in the store. This results in a flexible shopping experience for them.

- More than 6,000 Vensafe solutions installed all over Europe
- Technology specially developed for the retail industry
- Flexible options to meet retailers' needs

TAKE CONTROL

Reduce cost - Increase profit

ZERO SHRINKAGE

- ⊕ Customer gets the goods after paying
- ⊕ Logbook entry for each operation in machine
- ⊕ All events are saved in LOG-File
- ⊕ When products are impossible to shoplift, thieves disappear

INVENTORY MANAGEMENT & CONTROL

- ⊕ Easy integration with the POS system
- ⊕ System alerts when items need to be refilled
- ⊕ Centralized analysis of inventory
- ⊕ Central "Out of stock" alarm
- ⊕ Inventory can be handled by a supplier

OPTIMIZED CHECKOUT ZONE

- ⊕ Perfect sales presentation of products
- ⊕ Large product cards presenting the product
- ⊕ Up to 240 products
- ⊕ Double placement at the checkout and on the shop floor

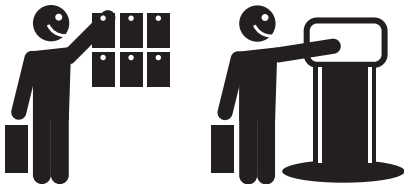

MINIMAL WAREHOUSING

- ⊕ Reduced stock
- ⊕ Manage stock level via remote control
- ⊕ Only the fast-moving items are available in quantity
- ⊕ Reduce storage costs
- ⊕ No inventory differences

HOW IT WORKS

Quick and easy for the customer

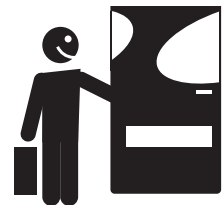

With the Vensafe Easy Shopping concept you will eliminate your loss and increase sales on small, valuable products. Products are merchandised using product cards and/or touchscreen kiosks. Vensafe dispensers are positioned between the checkout and store exit.

Choose products

Pay at checkout

VENSAFE

Modular solution easily tailored to any store size & turnover

VENSAFE DISPENSERS

Inventory control and flexible features

The dispensers can operate as a single unit or can be linked together with dispensers of other sizes or features to serve your specific needs.

- Max capacity: 80 products and 1,600 articles
- Can also be delivered with a cooling system
- Full inventory control by displaying stock levels and highlighting which products need refilling
- Time-stamp logging of every transaction gives full traceability of all handlings, including a report if a product was not retrieved
- Optional features include a GSM module that sends out-of-stock notifications to store associates
- Flexible hangers to support products of different sizes

VENSAFE TOUCHSCREEN

User-friendly click & select

Shoppers can easily access required products as the touchscreen can either be configured by category or by showing all available products.

- Flexible placement: The screens can be placed on the shop floor or by the checkout counters
- One-click solution: Click on the selected item and the ticket is printed
- Promotions: Product advertisements can be displayed on the screen

PRODUCT CARDS

Competitive exposure without stock shrinkage

The product cards are placed throughout the store, replacing the premium price products. Customers take a card and proceed to the checkout.

- Clear display of the available products
- Easy access for customers
